

Animal Cages for Laboratory Small Rodents (Mice)

Orchid's Animal Cages are designed to facilitate animal welfare, meet research requirements and minimise the experimental variations. However, while selecting the cage, guidelines for laboratory animal facilities by concerned government organization regarding the minimum space requirements for housing of laboratory animals must be followed. As caging equipment is one of the most important factors in the physical and social environment of the experimental animal, Orchid has developed the largest range of cages meeting current norms and guidelines.
